

## BUWAflexstore

De BUWAflexstore is a new and unique water storage system.

### BUWAflex storage system

This unique system is a complete closed solution for water storage.

The tank has specific features to fit in combination with the Buwaflex liner/cover. Prefabricated outlet for outside rainwater is fully integrated in the tank wall.

The BUWAflex liner and cover are fully integrated and will form one complete package. That makes it easy to install and gives the perfect solution to keep sunlight, external pollution(leafs, dust, etc ) outside the tank. Unable you to maintain a controlled water quality.

Primairily the BUWAflex storage system will be used for rain and drinkable water. The material will be high quality reinforced and UV-resistant materials guarantees a long life circle.

Combination with our new WSE and WSEA tanks the perfect solution for export

### Advantages

- Completely closed system
- Easy installation
- Good solution to avoid algae growth
- Constant water quality
- Perfect solution to avoid pollution into the water
- Long life time
- No wind damages of the liner
- No evaporation of water
- Low maintenance costs
